Taiwan National IT curriculum

Junior high IT consists of 90hr spent in computer classrooms (approx. 45min over 40wks for 3 yrs)

- **Algorithm (56%)**
Scratch, Algorithm Concepts, App Inventor & Python
- **Ethics, Laws & Security (14%)**
Not Including Copyright Laws
- **General Knowledge (13%)**
Computer System, Internet, History, Industry
- **Data (11%)**
Google Sheets & Microsoft Excel *LibreOffice only mentioned
- **Copyrights & CC (3%)**
Fair Use & Creative Commons
- **Digital Media (3%)**
Digital Sound, Image & Audacity

Distribution of Weekly Themes in *Han Lin's* 2023 Junior High School IT Curriculum for 7th-9th Grade (Based on Taiwan Government's Curriculum)

Taiwan National IT curriculum

And how to justify the LibreOffice/FLOSS-related knowledge in the IT course

- Algorithm (56%) → Licenses of the tools and their meanings
Scratch, Algorithm Concepts, App Inventor & Python
- Ethics, Laws & Security (14%) → How FLOSS can be ethical and secure
Not Including Copyright Laws
- General Knowledge (13%) → The inherent open source spirit of IT
Computer System, Internet, History, Industry
- Data (11%) → Just teach using Calc instead, also ODF
Google Sheets & Microsoft Excel *LibreOffice only mentioned
- Copyrights & CC (3%) → Dive into (free) licensing cases and resources
Fair Use & Creative Commons
- Digital Media (3%) → Open (social/online) media making with FLOSS tools
Digital Sound, Image & Audacity

Teaching plan for a 10hr class

2 Hours

Basic concepts

FLOSS vs commercial, ODF vs OOXML, Public Money? Public Code!
Exercise: identifying and analyzing free software

2 Hours

Case studies

Software: Mainly LibreOffice, mentioned Scratch, Mastodon & Firefox
Policy: EU and Taiwan govt software procurement (w/ videos & handouts)

4 Hours

Group researching & presentation making

Choose from the topics & materials provided by instructor. Topics include deep dives into above issues, also comparison of LibreOffice, Google Docs & Microsoft Office

2 Hours

Final presentation & note taking

File format must be ODF. Students are encouraged to use LibreOffice to present. Graded by quality of presentation, how well fellow pupils understand the presentation and one's notes on others' works

Example slide of basic concepts

Public Money? Public Code! 的好處

提高透明度

公平競爭

資源合理利用

Example slide of basic concepts

The benefits of [adapting] “Public Money? Public Code!”

More transparent

Compete fairly

*Utilize resources
reasonably*

Facebook與 Instagram 的專有限制 vs 開放的Mastodon

Example slide of case studies

***The limits of proprietary
Facebook & Instagram***

vs

The open Mastodon

Example slide of case studies

微軟如何在政府與 學校進行供應商綁定

Example slide of case studies

How Microsoft made vendor lock-in possible in government and school settings

Example slide of case studies

Two students are performing on stage. The student on the left is wearing a dark blue polo shirt and a dark blue face mask. The student on the right is wearing a white short-sleeved shirt and a light blue face mask, holding a blue microphone. The background is a whiteboard with red Chinese characters and some faint writing.

可以避免檔案容易跑掉 比較方便 更多的自由 可以跨平台 兩方要都要能無礙閱讀、可進行作業

[illegible]

[It] can [help] avoid [unwanted] file changes[.] More convinient[.] More freedom[.] Cross platform[.] Both parties can read and work on [the file] without obstacles[.]

Challenges & Opportunities

01

Cloud-centric mindsets

Faculty and students are used to an all-Google, web & mobile-only environment. Little infrastructure investment in online version of LibreOffice.

03

Curriculum lacks FLOSS concepts

Few & fractured mentioning of FLOSS concepts in curriculum. (Scratch is largely used, but as a tool, not for its free values.)

02

IT as non-major subject

Less control from school & parents in how to teach, but learning is almost limited to bi-weekly class meetings.

04

Increasing digital divide

Digital literacy, belief systems & study needs built very differently among pupils, resulting in hardship in teaching FLOSS concepts.

Lessons Learned

01

Simplify materials

Don't be afraid of oversimplifying. Focus on passing the right values for the majority, while allowing critical thinkers go further.

03

Adapt for Cloud Natives

Plan ahead and do what your resources allow – teach saving, propose alternative collaboration skills, build a server, teach building servers...

02

Personalize for potential contributors

The high achievers are full of potential for the community. Show them the codes, let them contribute now (but also teach them to behave) – there's no minimum age to join!

04

Stick with the values

Teachers are the moral compass for kids. Don't treat software as a neutral tool, but something that can lead the society to be better or worse.
