# THE BEGINNING OF EVERYTHING

Due to the shared interest in Ubuntu, the founders of Ubuntu Indonesia first got in touch via a mailing list. From this online community, a meeting was held and decided to establish the Ubuntu Indonesia community with the goal of **spreading awareness of Ubuntu, making it more accessible, contribute to Indonesia's technological advancement.**

# OUR MOVEMENT

- Translating Ubuntu to Bahasa Indonesia
- Empowering small businesses to use Ubuntu OS
- Assisting operating system migration for offices and organization
- Participate in various Linux conferences.
- Established help center.
- Produce and distribute Ubuntu CD installer.
- Established repo server locally.

As the community go bigger and discovered more opportunities, we decided to go official, **Ubuntu Id** was **officially founded** on **August 16th, 2012** in Jakarta

# THE FUTURE IS IN YOUR HANDS

We are very proud of what we achieved so far. However, **Ubuntu Id is a community-based movement**, and sometimes.. life happens.

It's in our best interest for the community to keep growing and contributing to the world of technology and Ubuntu development. We've build access, community, networking, official documents that are available as resource.

With an open heart and mind, we are looking for **successors who can continue the vision** of the Ubuntu ID community. **We promise to always help and support movements that can keep this community growing and beneficial.**
